Qualifying test for Cables, Technical University of Brunswick, iBMB No. Z-19.11-1165

In the year 2012 we, BASF Personal Care and Nutrition GmbH, Illertissen, now producer of Barra®Flame DMA took over the product formulation and specification data from our sister organization PCI Augsburg GmbH, formerly owners of the Barra®Flame brand.

Having been producers of intumescent coatings for more than 60 years and having produced similar products under the brand of KBS® Foamcoat since the 1980ies, we can assure you that the chemistry and formulations of both systems are almost consistent with each other. Therefore we regard the findings described in the above referenced report No. Z-19.11-1165 as equally valid for Barra®Flame DMA.

We trust for your appreciation and hope that this statement may clarify any misgivings.

Truly yours,

BASF Personal Care & Nutrition GmbH
